

# C3 Generative AI for SAP

## Supercharge SAP Investments with Unified Knowledge Source

C3 Generative AI for SAP is a unified knowledge source that empowers teams to quickly discover, access, and act upon data and insights across finance, supply chain, sales, and human capital through an intuitive search and chat interface.

<h3>Swift Retrieval</h3> <p>of critical and valuable insights that previously required specific subject matter expertise and manually navigated data</p>	<h3>Domain Specific</h3> <p>models embedding deep functional expertise to help teams discover insights and improve decision making</p>	<h3>Enterprise Grade</h3> <p>data security, access controls and flexible deployment allow enterprises to meet strict security and privacy requirements</p>	<h3>Future Proof</h3> <p>SAP investments with a model-agnostic solution architecture that offers multi-LLM support</p>

Organizations leveraging SAP systems and applications need deep subject matter expertise to traverse custom ERP instances to surface visibility into business performance. Teams across finance, supply chain, project management, and human capital find it increasingly complex and time-consuming to sort through large volumes of data and locate insights.

C3 Generative AI for SAP provides prebuilt connection to SAP systems and domain object models that make codified SAP data instantly accessible via an intuitive search and chat interface. Enterprise users can ask questions in natural language and receive accurate answers ranging across financial planning, treasury management, customer experience, manufacturing and logistics, procurement, supply chain, and human resources.

C3 Generative AI for SAP is an enterprise-ready solution with support across both structured and unstructured data, an LLM-agnostic architecture, deterministic responses with source references, and granular enterprise access controls. C3 Generative AI for SAP offers rapid configurability via native connections to SAP systems and domain object models.

### Use Cases

- **Quickly access insights** from anywhere in your SAP investments, including supply chain data for production versions, BOMs, inventory availability, and order status
- **Get procurement analytics** to find invoices for pre-processing, error-resolution, and guided buying and requisition decisions
- **Enable logistics management** by expediting transportation planning, execution, resource tracking, and monitoring
- **Enhance inventory management** by quickly identifying shortages to re-allocate inventory, and audit resource plans
- **Support intelligent scheduling** with access to project plans, resource portfolios, forecasts, and project asset information
- **Effectively manage risk** through rapid access to financial data, compliance regulations, configuration controls, and audit workflows
- **Enable enterprise-wide visibility** with information retrieval of data on inventory, manufacturing, logistics, and planning
- **Support financial analytics** with insights into accounting, payables, receivables, collections, and expense and revenue management
