

C3 Generative AI for Human Resources

Unified Knowledge Source to Enhance People Operations

C3 Generative AI for Human Resources is a unified knowledge source that enables human resources teams to rapidly locate, retrieve, and act on enterprise data and insights through an intuitive search and chat interface.

<h3>Rapid Access</h3> <p>to relevant, critical, and high-value insights across disparate datastores, applications, and information systems</p>	<h3>Domain Specific</h3> <p>models combining industry and human resources expertise to help enterprises achieve critical business outcomes</p>	<h3>Enterprise Grade</h3> <p>data security, access controls and flexible deployment allow enterprises to meet strict security and privacy requirements</p>	<h3>Future Proof</h3> <p>investments with a LLM-agnostic architecture and ability to integrate and leverage existing data and software investments</p>

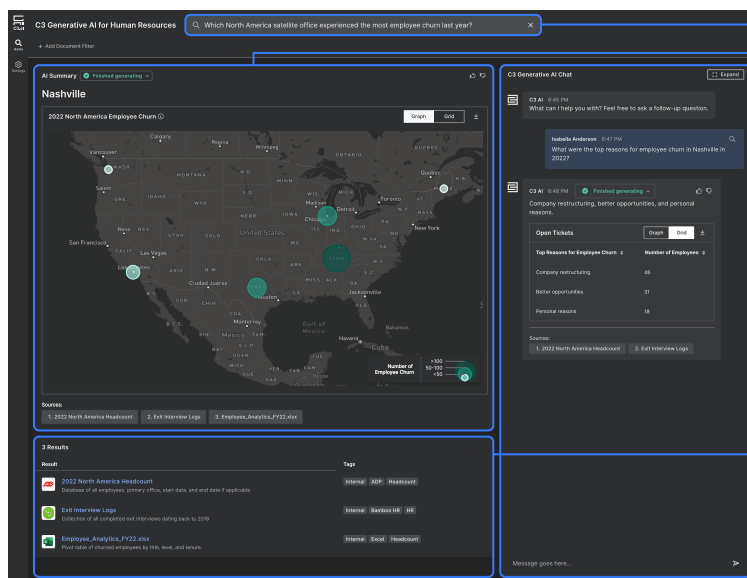

Today's talent organizations face a growing challenge of acquiring top talent and overseeing workforce performance without compromising the employee experience. Human resources teams find it increasingly complex and time-consuming to navigate large volumes of data across internal and external information systems and locate relevant insights.

C3 Generative AI for Human Resources enhances productivity and improves employee satisfaction with accelerated time to insight. Users can ask questions in natural language and receive accurate answers ranging across HR policies, payroll, performance metrics, training materials, and employee feedback and information.

C3 Generative AI for Human Resources is an enterprise solution with support for structured and unstructured data, a LLM-agnostic architecture, deterministic responses with source references, and granular enterprise access controls. C3 Generative AI for Human Resources offers rapid configurability with human resources domain models and provides prebuilt connectors to common HR Information Systems.

Use Cases

- **Quickly access insights** from anywhere in your enterprise stack, including your HR Information Systems, performance data, training materials, payroll, and other siloed data sources
- **View employee specific information in one place** related to start date, role, compensation details, reviews and ratings, communication logs, and HR tickets
- **Optimize workforce planning** through complete visibility to headcount, transfers, compensation, and the latest plans for talent and talent acquisition
- **View talent acquisition pipelines** through rapid access to data on candidates, open requisitions, interview notes, and references
- **Enhance employee experience** by empowering human resource teams to support onboarding, provide relevant training materials and compliance documents
- **Streamline performance management** through rapid querying information on reviews, employee feedback, 1:1s, KPIs, and employee ratings
